Ampire's P-cap Solutions

In housing design and production for projective capacitive touch panel.

Various Structure Supports

Tape bonding and use it as OGS solution

Two times bonding as sandwich design Advantage of optical bonding:

- 1. Protection purpose for Vandal or weatherproof.
- 2. To increase the clarity and visibility by reducing the internal reflection.
- 3. Anti-vibration, shock, shakes protection.
- 4. Anti-dust and moisture-proof by filling the gaps.
- 5. It is applied to any kind of display, such as mono LCD, TFT, OLED.

Application:

Kiosk, military display, transportation display, fish finding

- Frame

- Front Panel Case
- Black Printing
- OCA/OCR Optical Bonding
- Double Sided Tape
- Gap between Touch Sensor and LCD Module 0.5mm(min).
- Metal Back Panel
- Metal Conductive Mesh

02 I 03 WHAT'S NEW Industrial quality LCD module and solution manufacturer

Various Structure Supports

Air bonding/ No bonding needed. Saving the optical bonding cost.

Advantage of Air bonding:

- 1. Cost saving from optical bonding.
- 2. Easy installation.
- 3. Easy repairing.

Application:

outdoor application, gaming, public Kiosk

Advantage of Ampire Projective capacity touch panel:

- 1. Full sizes supporting from 3.5"~15".
- 2. Easy design various OS supporting, tuning kit support, FW update software installing in customer system.
- 3. Air gap solution for optical bonding cost saving.
- 4. Bonding service support.
- 5. Standard cover lens as options.
- 6. Thick cover lens supporting- up to 9mm.
- 7. Glove touching supporting.
- 8. Water resistance.
- 9. Palm rejection support.
- 10. Wide OP temperature supporting- up to -30~+80 by request.

Supporting size

Reshaping Display Solution

Advantage:

- 1. Low cost comparing with customized TFT glass.
- 2. Low MOQ for customized size.
- 3. Flexible size available, 5"~15".
- 4. Shorter lead time: Design duration around 12 weeks.

04 I 05 WHAT'S NEW Industrial quality LCD module and solution manufacturer

Ampire's value adds

MCU interface

It is a micro controller that receives 16-bits control data and drive a TFT display with RGB interface. It helps the customer to design TFT display through a more familiar plateform. This chip is desgined and patented by Ampire. It also makes the display module option more fexible and extends the product life cycle.

• Available up to 800x480 resolution

Super wide view angles

Ampire incorporates the latest IPS & MVA technologies that deliver extremely wide viewing angles up to 89 degrees. In other words, the color of the image remains the same from all directions. This is ideal to make applications that focuses on color accuracy for multiple users.

- Avaliable in 10.1" (IPS)
- Available in 4.3", 10.4" (MVA)

High brightness

Ultra high brightness

Outdoor equipments are getting lighter and more powerful to handle sophisticated tasks. LCD displays are applied in more industrial equipments other than communication devices. High brightness are extremely important against sunlight. Ampire is able to implement high brightness backlight up to 1000 nits to the displays.

- High brightness available in all sizes
- Extreme high brightness available in 3.5", 4.3", 5", 5.7", 7", 8", 8.4", 9", 10.1", 10.4", 12.1", 15"

Enhanced wide view angles

Many industrial applications do not focus on the color accuracy from all angles. Instead, the uniformity of color is more important and minor color shifting is acceptable. Ampire is able to enhance any TN glass with our EVA process. The viewing angles are uniform up to 85 degree. It also has more cost advantage than IPS technology.

• Available in all sizes up to 15"

This is the most adapted interface for systems with high end processor and high resoltion display panels. It has high speed data transfer and low noise level.

• Available in 640x480 resolution and up

Wide temperature tolerance

(automotive grade)

This is one of the most important criteria in industrial application development. Ampire is able to build display module using materials with high temperature tolerance and design the structures with fast heat sink to tolerate high temperature environment. Heater circuit can also be built-in to tolerate low temperature environment.

• -20 °C to +70 °C in all size

• Special temperature range can be built upon requests

Products

(85°) Ultra wide view angles

Extreme wide view angles

Industrial quality LCD module and solution manufacturer

Services

Standard LCD module production

Ampire provides all of the standard LCM models that can be found in the market.

Semi-customized LCD module production

Ampire assists the customers to add special features on standard TFT displays and to put them into mass production.

Full-customized LCD module production

Ampire listens to the customers, communicates with them and understand their requirements to make their innovative idea of STN displays from nothing to reality.

LCD backend processing

Ampire is capable of processing the LCD panels from glass cutting, liquid crystal injection to sealing.

OEM

Ampire is qualified by the leaders in LCD manufacturing, such as AUO, CMI and Hannstar, Kyocera to co-work with them in their strategic production planning.

About Us

Established in 1998, Ampire is a manufacturer with revolutionary vision and innovative ideas in small and medium size LCD modules for industrial applications.

Starting from TN models, Ampire team never stops acquiring new technologies and working synergistically with every partner. Over the years, Ampire has successufully adapted STN mono display, TFT color display, and lately, Capacitive Touch Panel solutions into the product lineup. With experience and effort, Ampire has sharpened the mastery in customization of LCD modules.

Besides providing a complete lineup of displays, our team also focuses on integrated controls and easy display system solutions. Customers in all markets, especially industrial control, can find practical solutions to adapt STN or TFT into their applications.

Our team does not only develop a piece of LCM for you. We communicate to our customers with enthusiasms and sincerities in developing their applications with right solutions of good quality. We want to assist our customers to do the right thing at the first time. Your experience and satisfaction are our top priorities. In partnership with Ampire, you are one step closer to your goal.
